THE "DO GOOD" CAMPUS

The University of Maryland commits to becoming a global leader in advancing social innovation, philanthropy and nonprofit leadership with its Do Good Campus.

Our Do Good Campus effort amplifies the power of Terps as agents of social innovation and supports the university's mission of service. We're working to ensure all University of Maryland students graduate equipped and motivated to do good in their careers, their communities and the world.

We:

- Created the Do Good Institute to serve as the campus hub of social impact and innovation;
- Developed a Do Good Challenge and Do Good Accelerator to scale up the impact of student projects and ventures;
- Cultivate new research on philanthropy, civic engagement and nonprofits;
- Expand opportunities for students to learn about and practice giving back.

Our Do Good campus will lead to a Do Good world.

For more information, visit *dogood.umd.edu*.

SPRING COMMENCEMENT / MAY 22, 2020

Dear University of Maryland graduate,

Congratulations on your graduation! The conferral of your degree today is a milestone achievement that brings great pride to your family, friends and the University of Maryland. We all have much to celebrate today.

Though the global public health crisis makes necessary a virtual ceremony, it cannot detract from the significance of this cherished moment as you commence a new phase in your life's journey.

Your time on campus has been an opportunity to learn and grow intellectually, professionally, socially and personally. The faculty, staff and administration of the university are confident that you will make a difference in the world. We are a better institution because you were here and of what you have accomplished, in and outside the classroom.

Today I'm "graduating" as well, though it has taken me 10 years to do so. I feel as if I'm a member of the Class of 2020. I, too, share your mixture of accomplishment and sadness that accompanies the closing of a chapter. It makes today's commencement all the more meaningful to me.

The university is an intergenerational family, consisting of those who came before, those who are here today and those who will come tomorrow. Now you join our alumni, over 377,000 strong.

Please stay in touch with your alma mater, the "mother who nourishes." And remember: Once a Terp, always a Terp.

My very best wishes to your family and friends. I bid you Godspeed as you commence the next chapter of your lives.

Sincerely,

Wallace D. Loh, *President*

On behalf of the University of Maryland Alumni Association, congratulations on your graduation! I want to welcome you into our family of more than 377,000 Terps.

The world has changed so much since March, something you have experienced firsthand. You and your graduating class have been put to the test, and you've passed with flying colors. You are now officially a graduate of the University of Maryland, and I want to take the opportunity to make you a promise: Your Alumni Association is going to be here for you.

As our gift to you, please enjoy one free year of membership in the Alumni Association, after which I encourage you to make a commitment to your alma mater by becoming a lifetime member. By becoming a Terp for life, you will leave your own legacy and show your support for the University of Maryland.

Your Alumni Association and your membership will help you stay in touch with friends you made on campus, prepare you for your career through networking and professional development, and keep you informed about alumni and campus news.

It is my wish that as alumni, you will wear our colors proudly and continue to demonstrate to the world the high-quality education Maryland provides. In turn, Maryland will continue to educate the country's brightest students, pursue cutting-edge research, encourage innovation and entrepreneurship, explore the arts and defend our athletics titles. As a student, and now as a graduate, you will always be a Terp and always have a home at Maryland at the Samuel Riggs IV Alumni Center—be sure to visit us when you come back to campus in the years ahead.

Now go forth with the strength of your Maryland degree, and remember that your Alumni Association is here to help you stay active, stay informed, stay connected and stay fearless.

Go Terps!

Jim Spencer '90
President, Maryland Alumni Association Board of Governors

Speaker Biographies

CITRUPA GOPAL
STUDENT SPEAKER

Citrupa Gopal had never been to the United States before coming to the University of Maryland, but for someone who wanted to dedicate her life to research, the only choice for college was to try something completely different.

"There's a certain joy to discovering things for myself," she says. "Even in day-to-day life."

Growing up in Hyderabad in the south of India, Gopal was always interested in studying the sciences. While universities closer to home offered good options in engineering and medicine, it was UMD—and its First-Year Innovation and Research Experience (FIRE) program—that had the immediate, hands-on opportunities in biology that Gopal was seeking.

"I thought, 'Why not take the plunge?'" she says of the 8,000-mile journey to College Park.

Gopal is graduating with a bachelor's degree in biological sciences, earning a 3.9 GPA and Dean's List honors for every semester. She also received the Office of Multi-Ethnic Student Education's Award for Academic Excellence all four years.

The research experience lived up to her expectations as well, as she actively participated in experiments and forged strong relationships with faculty. A BioFIRE Summer Research fellow, Gopal did fieldwork evaluating bacteria in the tributaries of the Chesapeake Bay, and later learned about stalk-eyed fly husbandry, chromosomal drive and genotyping, and investigated the insect's expression of immune-response genes.

In addition, Gopal took part in an Alternative Breaks program planting trees on farms to help prevent runoff, tutored fifth graders at Carole Highlands Elementary School in Takoma Park and was a teaching assistant for an introductory microbiology lab course.

Gopal plans to return to India and then apply to graduate school programs in the United States, Canada or Europe. She is interested in pursuing a doctorate to become a "full-fledged researcher" and possibly teach.

In whatever direction she takes, Gopal remains committed to trying new things and following new ideas.

"Sometimes they don't work, sometimes they do," she says. "The exhilaration and pride that I experience when things finally do work out is something I want to keep experiencing."

MICHAEL NASTAC
UNIVERSITY MEDALIST

The path Michael Nastac set off on while watching Carl Sagan's television series "Cosmos" as a child has taken him through some of the most prestigious laboratories in the world and led him to the cusp of a bright career in physics.

"Michael is brilliant, driven, friendly, charming, collaborative, and yet also appropriately competitive," says physics Professor William Dorland. "Clearly, he isn't the traditional 'student leader' type. He is a scientific leader, already establishing himself as a world-class intellectual force."

A Banneker/Key Scholar and Honors College student from Pittsburgh, Nastac came to UMD with a general interest in physics and mathematics before delving into magnetic confinement nuclear fusion and its potential to revolutionize the field of sustainable energy. He began researching plasma turbulence both at UMD and at the University of Oxford, working to construct simple mathematical models that could be handled by present-day computers and help resolve one of the great conundrums of nuclear fusion: the energy input to current fusion reactors is greater than the energy put out by them.

"He never needs someone else to instill a sense of urgency in him," says Alexander A. Schekochihin, professor of theoretical physics and fellow of Merton College at the University of Oxford. "He is clever, quick on the uptake, industrious, independent, communicative, articulate (and) extremely well educated."

Nastac is graduating with a double degree in physics and mathematics and a 3.99 GPA. He won a poster prize at the 2019 Sherwood Fusion Theory Conference; gave talks at the Princeton Plasma Physics Laboratory, the University of Oxford and the 12th Plasma Kinetics Working Meeting at the Wolfgang Pauli Institute in Vienna, Austria; and is first author of an upcoming publication in the *Journal of Plasma Physics*.

Next year, Nastac will be a Clarendon Scholar at the University of Oxford, pursuing a doctorate of philosophy in theoretical physics. He plans to continue pursuing solutions to the world's energy crisis and also wants to teach; as a member of the Foundational Learning and Mentorship Experience (FLAME) program, Nastac taught after-school science lessons to students at Adelphi Elementary School.

"It feels incredibly rewarding to see how much fun these young students are having by learning about the same topics that inspired me to pursue science," he says. "In graduate school and beyond, I want to continue mentoring others, paying forward what I've received from my mentors."

TANAY WAKHARE
UNIVERSITY MEDALIST

A voracious reader and dreamer who had an unsettled childhood that stretched across three continents and four U.S. states, Tanay Wakhare finally found the freedom he was looking for at the University of Maryland.

Not only did he grow into a promising scholar of mathematics and computer science, but he discovered himself in all the ways college makes possible.

"I pulled all-nighters talking in freshman dorms, I took quantum physics, I classified bones in a zooarchaeology lab, I backpacked through Europe on my own," he says. "I spent a year exploring every nook and cranny of campus, and fondly remember watching the sunrise from the roof of the McKeldin Library."

A Banneker/Key, Goldwater and Churchill Scholar, Wakhare is graduating with degrees in computer science and mathematics, earning a 3.96 GPA and a host of university honors along the way, including the Dan Shanks Award from the Department of Mathematics and the J.R. Dorfman Prize for Undergraduate Research.

"He is one of the top undergraduates I have known in my 46 years of teaching," says mathematics Professor Lawrence C. Washington. "I feel like I am talking with a professional mathematician rather than with an undergraduate."

In fields ranging from number theory to mathematical physics, Wakhare has authored multiple papers and worked at institutions including the University of Queensland, Dalhousie University, the National Institute for Mathematical and Biological Synthesis and the Center for Nanoscale Research at the National Institute for Standards and Technology.

"Tanay Wakhare is an exceptionally talented young mathematician, by far the best student I have ever met in my career," says Professor Christophe Vignat of Paris-Sud University. "He has a very promising future in mathematics … and should quickly be part of the leading scientific community of his country."

Fascinated by artificial intelligence, Wakhare wants to bring more rigorous mathematical principles to the AI world, such as constructing machine learning models that can train on biased datasets without simultaneously mirroring their flaws. He will pursue a master's of philosophy in advanced computer science at the University of Cambridge as a Churchill Scholar before heading to the Massachusetts Institute of Technology to work on a doctorate in theoretical computer science.

ELAINE JOHNSON COATES
HONORARY DEGREE RECIPIENT

Elaine Johnson Coates recalls the day that her high school guidance counselor told her she couldn't go to college and should be a secretary. Coates believed she'd failed the "paper bag test"—her skin color was too dark.

But she wrote the University of Maryland seeking a scholarship and in 1955 became one of the first seven African American students allowed to live on campus. Four years later, she was the first black woman to earn a bachelor's degree at UMD.

Coates grew up in Baltimore and attended segregated Frederick Douglass High School. After the Supreme Court's 1954 *Brown v. Board of Education* ruling, Coates decided to go to the University of Maryland "because I could." When the counselor refused to write Coates a letter of recommendation, Coates' mother encouraged her to write her own.

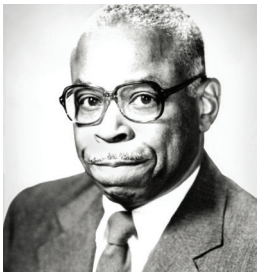
Living in Caroline Hall "was very lonely at first," she says. "Some girls would speak to me in the dorm, but when they got outside, I guess because of peer pressure, it was a very different thing."

Coates also found unequal treatment in classrooms. When she'd compare test results with fellow residents, she'd find that "we could have written the exact same thing, and that person would have an A- and I'd have a C-."

Still, Coates persisted. "I had a plan and I had a purpose," she says. "I wanted to do something that had never been done in my family ... I wanted to make my family and my church proud of me, and those whose shoulders I was standing on were very strong."

After earning a degree from the College of Education, Coates began a long career in social work and teaching. Her two children—a personal trainer and an OB/GYN—also graduated from Maryland.

Last spring, the Alumni Association honored Coates with a new award for a graduate who has made a significant contribution that fosters diversity and inclusion—an award named in her honor. Coates also addressed the Class of 2019 at Commencement. "I stand upon this podium and look out at the diversity in the beautiful faces of this graduating class, and it tells me that my journey mattered," she said.



HIRAM T. WHITTLE
HONORARY DEGREE RECIPIENT

Born in Baltimore in 1931 to a dry cleaning worker and homemaker, Hiram T. Whittle dreamed of one day becoming an electrical engineer.

Whittle initially enrolled at Morgan State College in September 1948 to study mathematics but a year later he applied for admission as a first-year engineering student at the all-white University of Maryland. After receiving no response, and with the assistance of the National Association for the Advancement of Colored People and lawyers such as Thurgood Marshall, Whittle petitioned Baltimore City Court for a decision on his application without regard to skin color.

University and state officials denied him admission in August 1949, citing the "separate but equal" doctrine and the Maryland State College at Princess Anne, now the University of Maryland Eastern Shore, as the land-grant higher education institution for black Marylanders.

Undeterred, he continued studying at Morgan State while fighting in the courts to attend UMD. On Jan. 31, 1951, the Board of Regents acknowledged engineering opportunities were not equal between College Park and Princess Anne, and in February, Whittle became the first African American to enroll in an undergraduate degree program at the University of Maryland.

Living in a campus dorm near Ritchie Coliseum, Whittle focused on his coursework, which included engineering mechanics and drawing, along with sociology and government and politics. He left the university in June 1952 without completing his degree and moved to New York City intending to continue his education. Instead, he worked in factory jobs and returned to Baltimore in 1955, working in a grocery store and then using his educational background to draft electrical lines for city engineering consultants. Since 1967, Whittle has been employed by the city of Baltimore and today, at age 89, still works there full-time as a title records assistant.

A lifelong and devout Jehovah's Witness, Whittle spends his free time serving his religious community.

STENY H. HOYER
COMMENCEMENT SPEAKER

It was at the University of Maryland that Steny Hoyer first heard the call to pursue a life in public service. As a student, he listened to an address on campus by President John F. Kennedy and was inspired to get involved in politics, beginning a journey that would lead to him become the first Marylander in history to serve as majority leader in the U.S. House of Representatives.

After graduating in 1963 from the University of Maryland, earning the distinction of "Outstanding Male Graduate," Hoyer went on to receive his law degree from Georgetown University. That same year, he won a seat representing Prince George's County in the Maryland State Senate. Inspired by the civil rights movement, he cast one of his first votes to end the ban on interracial marriage in Maryland, and he focused his work in the State Senate on making housing more affordable and equitable and expanding transit options for commuters as the county grew. In 1975, at age 35, Hoyer became the youngest State Senate president in Maryland's history, a record he still holds. He was first elected to Congress in 1981.

As the longest-serving member of the House in Maryland's history, Hoyer has spent every day fighting for the people of the state's Fifth District. He played a key role in the passage of such major legislation as the Americans with Disabilities Act, the Violence Against Women Act, the Help America Vote Act, the Affordable Care Act and the repeal of the "Don't Ask, Don't Tell" policy. He is a strong advocate for raising the minimum wage, ensuring equal pay, securing voting rights and combating climate change.

Hoyer's support for the university's expansion of research and teaching is rivaled only by his lifelong support for Maryland Athletics. In addition to securing funding for key university initiatives, Hoyer has also worked to expand federal funding for local facilities, public schools and community development programs that fight poverty. Hoyer has been a champion of full-service community schools, helping to launch and grow Maryland's nationally recognized network of early childhood centers. He has also been a tireless advocate for a cleaner and healthier Chesapeake Bay, securing millions in funding for bay cleanup programs.

Hoyer is a former member of the Board of Regents of the University System of Maryland. He and his wife, the late Judith Pickett Hoyer, have three daughters, three grandchildren and three great-grandchildren.

Doctoral Degrees

The doctoral degree is the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally doctor of audiology, doctor of medicine, juris doctor, doctor of pharmacy and doctor of veterinary medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees on March 9, 1841.

MAY 2020 CANDIDATES

DOCTOR OF AUDIOLOGY

Casey R. Gaskins
Jessica L. Kreidler
Kelsey A. Oppler
Lindsey S. Roque
Ronella N. Rosenberg

DOCTOR OF EDUCATION

Anita C. Walls Education
An Investigation Into the Subjective Exclusionary Discipline Practices in a Large School District

LaTonya Williams Education
Investigating Distributed Leadership Practices of Elementary Principals in a Large School District

DOCTOR OF MUSICAL ARTS

John D. Boatright
Statements on Isolation, Memory and Acceptance

Amanda K. Dusold
The Oboe is a Lady: The Legacy of Britain's Female Professional Oboists, 1920-2000

Natalie Groom

Master's Degrees

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate. A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts and Master of Science degrees in fields other than agriculture.

MAY 2020 CANDIDATES

MASTER OF APPLIED ANTHROPOLOGY

Maeve Bassett
Kaleigh Christine Blair
Abigail Elizabeth Johnson
Sean Michael Jones
Madeline Elizabeth Laub
Elizabeth Anne McCague
Yi-En Tzeng
Hian Yong Yeo

MASTER OF ARCHITECTURE

Mansoor Ahmed
Elizabeth Conforti Brown
Sara Ghafar Samar
Gregory A. Goldstein
Collin James Haslup
Joanna Leigh Hess
Adam Thomas Knoebel
Dan McPaul Caranto Lorenzana
Enzo R. Montecinos
Taina Neugebauer Peters
Shanek Latisha Reid
Matthew William Rissmiller
Amber Nicole Robbs
Patricia Mary Rowedder
Amanda Nicole Sparks
Deane Lowell Townsend
Victoria Valentina Urdaneta
Kelsey Paige Winters

MASTER OF ARTS

Bachelor's Degrees

The bachelor's degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. Maryland Agricultural College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts and Bachelor of Science degrees in 1862.

Note: Latin Honors published in the commencement program are tentative and unofficial, pending the submission and calculation of all final grades for the semester of commencement.

With special thanks to the following campus divisions/departments responsible for commencement preparations:

Campus Recreation Services
Clarice Smith Performing Arts Center
Environmental Safety
Facilities Management
- Office of General Services/ Special Services
- Area Maintenance
- Building and Landscape Services
- Carpentry Shop
- Electric Shop
- Floor Shop
- Housekeeping Services
- Paint Shop
- Sign Shop

Intercollegiate Athletics Facilities
Memorial Chapel
Public Safety
Senior Council
Stamp Student Union
Transportation Services

An extra special thanks go to the Office of the Registrar and the Graduate School.

A heartfelt thanks go to the many volunteers who assist with the campus-wide and individual college and school ceremonies. These efforts are greatly appreciated.

The May 2020 class roster comprises degree candidates from the graduate and undergraduate programs at the University of Maryland, College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of the Registrar.

Commencement produced by the Office of Special Events · Book produced by Office of Strategic Communications · Division of University Relations · May 2020

Hail! Alma Mater

Hail to thee, Maryland!

Steadfast in loyalty,

For thee, we stand,

Love for the Black & Gold

Deep in our hearts we hold,

Singing thy praise forever,

Throughout the land.

UNIVERSITY OF
MARYLAND
